

Built right. Built to scale.

A digital product studio engineering web apps, mobile apps, and MVPs
for founders and SMEs across Morocco, Europe, and the US.

W H O W E A R E

Engineers who understand both code and business.

Codestika is a full-service web and mobile development studio based in Marrakech, serving clients across Europe, the USA, and North Africa.

We partner with startups and SMEs to design, build, and scale digital products that drive real results — from first prototype to production-ready platform.

10+

Morocco · MENA · Europe · USA

WHAT WE BUILD

Seven disciplines. One team.

Web Applications

Custom platforms, portals, and data-driven tools. Symfony, modern backends, clean architecture.

Mobile Apps

Native and cross-platform for iOS and Android. From concept to App Store deployment.

E-Commerce

Online stores with Stripe, PayPal, Klarna, and local gateways. Built to convert and scale.

MVPs & SaaS

From idea to launch fast. Scope, design, build, iterate — ship what matters first.

DevOps & Cloud

CI/CD pipelines, containerized environments, AWS/GCP infrastructure, monitoring.

UI/UX Design

Research-grounded interfaces. Wireframes to polished visual design that users enjoy.

AI & Automation

Custom AI agents, workflow automation, LLM integrations, and intelligent features — built into your product.

***Built to
ship.
Built to
last.***

H O W W E W O R K

From discovery to adoption — we don't disappear after launch.

01

Discover

Audit product, workflows, goals. Paid roadmap — no guesswork.

02

Design

UX research, wireframes, visual design grounded in business logic.

03

Build

Clean code, modern frameworks, continuous delivery. Progress you see weekly.

04

Augment

AI copilots, agents, and automations woven into the product where they create real value.

05

Adopt

We stay post-launch. Iterations, monitoring, and user adoption support.

Most dev shops ship and disappear. We're built differently.

Enterprise-grade engineering

Ten years of European engineering discipline — now accessible to founders in emerging markets.

We speak both sides

Engineers + customer success operators. We build the product and we make sure it actually lands.

Full lifecycle ownership

From architecture to adoption. One team accountable end-to-end — no handoffs, no finger-pointing.

Ship fast, build right

MVP speed without MVP mess. Clean code from day one so you're not rewriting in year two.

W H O W E B U I L D F O R

Our clients share one thing: they've outgrown off-the-shelf.

Founders

Validating an idea with a real product. Need an MVP that can evolve, not a prototype that dies in month three.

Scaling startups

Outgrowing no-code tools. Ready for custom infrastructure that matches their ambition and unit economics.

SMEs & retailers

Moving from offline to online, or upgrading legacy systems. Need partners who understand business, not just code.

Product teams

Existing companies with an internal tool, client portal, or data platform that needs to be built or rebuilt — properly.

LET'S BUILD

Have an idea that deserves to ship right?

We're selective about who we work with — because we stay with you past launch.

Start with a free discovery call. If it's a fit, we scope the build together.
